

# Movie Theater Relational Database ERD

## by Jessica Rinks

--Movie can have zero to many tickets  
--Ticket can have exactly one movie. Assuming not double features!  
--Ticket can have only one showtime.  
--Showtime can have zero to many tickets.

--Employee can have zero to many Transactions  
--Customer can have one to many Transactions (I assume that they aren't entered into the Customer table until they make their first transaction)  
--
